

Ring Sizing

Important: When printing make sure you select 'no scaling' or deselect 'scale to fit page'. This applies to both options.

Instructions:

Print and cut out ring sizer - cut a small slit along the line directed by the arrow. Curl the ring sizer, placing the pointed end through the slit and slip over finger. Pull the pointed end so the ring sizer fits your finger - ensure that it is not too tight and that it can still move around a little. (not too tight, but not too loose) Also make sure you can comfortably move the ring sizer over your knuckle. Your approximate ring size is the number that appears at the slit line (Read Size Here)

For measuring with an existing ring:

If you already have a ring that is the perfect fit, or if you are ordering a gift for someone else and cannot measure the finger, place an existing ring over a circle below - the inside edge of the ring should fit right against the circle line.
